

"I was bitten by a wasp on the job site. It was really painful but I used the bite away and the pain was gone in seconds and only an hour later when I checked the swelling had gone as well.

Now I always have one in my work truck."

**Ashley, Electrician.**

"My 9 yr old granddaughter came up to me and said "can I have that thing that stops the itch" I was so pleased that we have found something that she will use and it stop the itching."

**Keryn, Editor**

"My child comes up in red welts when bitten by Mosquitoes so we have to be so careful. Now we use the bite away and no more reaction."

**Cindy, Mum.**

"I recently used the bite away after being bitten by sand flies. Usually I react really badly with redness and itching for days. One application to each bite and the itching stopped. It was quick,

painless and easy to use. I

highly recommend bite away as a useful addition to the home and travel medical kit."

**Libby, Occupational therapist.**

# bite away®

## Relief in seconds

Medical device for the external treatment of insect bites & stings.

Bite Away works on natural concentrated heat being applied directly to the bite site.

An integrated microprocessor allow the temperature to reach approx. 50°C and remain constant for 3 or 6 seconds.

Heat being applied to the bite denatures the toxins/proteins and therefore stops the histamine reaction.

**NO SWELLING, NO PAIN, NO ITCHING**

As a result allergic reactions to bites are prevented and bites heal very quickly.

Works on 2 x AA Batteries which equals 300 applications. Then just change the batteries and keep healing.
